Monday, July 31, 2023 9:00 a.m.

Large Scale, Standardized Physiological pipeline to explore Neural Circuitry and Dynamics

HOST

Dr. Sarada Viswanathan, PhD
Dr. Austin Graves, PhD

LOCATION:

JHU Homewood Campus, Clark Hall, 316

Saskia de Vries, Ph.D.

Principal Product Manager
Allen Institute for Neural Dynamics

Speaker Bio

Saskia de Vries joined the Allen Institute in 2012 where she co-led the creation of the Allen Brain Observatory, an open physiological survey of the mouse visual cortex. Her background is in visual physiology, where she has used electrophysiology, optophysiology, optogenetics, and behavior to examine the roles of cells and circuits in the visual system. In 2022 she joined the new Allen Institute for Neural Dynamics as the Principal Product Manager where she is creating an open science platform for the reproducible sharing and re-use of data and code with the broader neuroscience community.
